

# Comprehensive Backup and Recovery You Can Trust

Protect your practice from server failure, ransomware, accidental deletion, and downtime with professionally managed backup solutions designed for dental offices.

## DDS Rescue Backup & Disaster Recovery (BDR) Solution

- Hourly full-server image backups
- Nightly encrypted cloud replication
- Virtual server failover if hardware fails
- Recovery in 60 minutes or less
- 24/7 monitoring and alerts
- Audited daily
- Hardware included
- Full HIPAA compliance program included

## DDS Rescue File-Level Backup

- Secure local and cloud backups
- Scheduled backups throughout the day
- 24/7 monitoring
- HIPAA-compliant backup process
- Assisted recovery support

### Quick Comparison

	File-Level Backup	BDR Solution
Backup Type	Files & folders	Full server image
Recovery Time	Several hours	~60 minutes
Virtual Failover	No	Yes
Cloud Backup	Yes	Yes
Monitoring	Yes	Yes
HIPAA Program	Basic	Full
Best For	Budget-conscious	Maximum Protection

### Our Recommendation

If uninterrupted access to your practice management software and patient data is critical, DDS Rescue BDR offers the strongest protection and fastest recovery. If budget is the main priority today, File-Level Backup is a solid starting point with the ability to upgrade later.
